PERSONAL RADIATION DETECTORS

PM1703M/PM1703MA
PM1703GN/PM1703GNA

These devices are used for detection and localization of radioactive sources. The instruments’ two operating modes enable the user both search for radioactive and nuclear materials as well as evaluate dose equivalent rate (DER). Extremely sensitive scintillation counters allow detection even of the slightest amounts of gamma and neutron radiation emitting materials.

Audio, visual and vibration alarms alert user when gamma or neutron radiation thresholds have been exceeded. All data is stored in the detector’s non-volatile memory. The stored information can also be transferred from the detector to a personal computer (PC) via infrared channel.

THE LATEST GENERATION IN RADIATION DETECTION FOR NON-TECHNICAL PERSONNEL

Ease of use and sensitivity make these watertight, robust monitoring tools essential for persons working in emergency services, customs and border patrol, police and for other specialists. Using of these devices doesn’t require any special knowledge or intensive training.

Functions
- Searching for radioactive and nuclear materials using the method of impulse count analysis with alarms and visualization on the built-in LCD of the average gamma and neutron radiation count rate
- Measurement of gamma radiation ambient DER of gamma radiation H*(10)

Applications
- Emergency service
- Customs and border patrol
- Civil defense and police
- Wide range of specialists whose activity is connected with detection and location of radioactive sources

Versions
- PM1703M, PM1703MA equipped with scintillation gamma detectors CsI(Tl)
- PM1703GN, PM1703GNA equipped with scintillation gamma detectors CsI(Tl) and neutron detectors Li6(Eu)
- The PM1703MA and PM1703GNA are more sensitive than PM1703M and PM1703GN

Features
- Highly sensitive CsI(Tl) and Li6(Eu) scintillation detectors
- Non-volatile memory
- Audio, visual and vibrating alarm
- IRDA communication with PC
- LCD display, electroluminescent backlight
- Shockproof, hermetic case
- Easy-to-use, two-button operation
